---

AI/ML Engineer with experience in building and deploying end-to-end ML systems using LSTM, LightGBM, and Transformers. Developed 3+ real-world projects with up to 20% improved prediction accuracy. Skilled in Generative AI, RAG systems, and MLOps using Docker, Kubernetes, and FastAPI.

SKILLS

- **Programming Languages:** Python, Java
- **ML / DL:** Scikit-learn, TensorFlow, PyTorch, CNN, RNN, LSTM, Transformers
- **NLP & GenAI**: NLTK, spaCy, Hugging Face Transformers, Diffusers, RAG, FAISS, LangChain, LangGraph, Prompt Engineering
- **Computer Vision**: OpenCV, YOLO, Image Processing
- **Data & Analysis:** Pandas, NumPy, Data Preprocessing, Feature Engineering, Data Visualization
- **MLOps & Deployment:** Docker, Kubernetes, Kubeflow, CI/CD (Jenkins), MLflow, Flask/FastAPI, REST APIs
- **DevOps & Cloud:** AWS, Terraform, Ansible, Prometheus
- **Backend Development:** Spring Boot, Hibernate, Microservices
- **Tools & Version Control:** Git, GitHub, Git Workflow
- **Database:** MySQL

PROJECTS

GenAI RAG Assistant for Document Q&A | Generative AI Project
• Built RAG-based system using LangChain, FAISS, and Transformers for context-aware question answering
• Implemented document ingestion (PDF/Text) and semantic search using vector embeddings
• Improved response accuracy by grounding LLM outputs with retrieved context
• Developed APIs using FastAPI for real-time query handling and response generation
• Built scalable, real-time inference system for handling user queries

Stock Price Range Forecast | Time-Series ML System
• Collected real-time stock data using **yfinance API** for NSE, BSE, and US markets
• Processed historical stock data (OHLC, volume) using Pandas and NumPy
• Built LSTM + LightGBM ensemble model for time-series forecasting
• Achieved **~15–20% improvement** over baseline models
• Generated multi-horizon predictions (5, 21, 60 days)
• Designed end-to-end pipeline from data ingestion → preprocessing → prediction

Big Mart Sales Prediction System | Regression ML Pipeline
• Developed regression model to predict retail sales using structured historical data
• Engineered features and handled missing values to improve model performance
• Trained and optimized models (Random Forest, Linear Regression) using cross-validation
• Identified key sales drivers and generated actionable insights through data visualization

---

EXPERIENCE

Intern – Full Stack Development with Java | Novillex Solutions Pvt. Ltd., Pune
• Developed and integrated REST APIs using Spring Boot for backend services
• Collaborated in an Agile team to design scalable application features
• Optimized SQL queries for efficient data retrieval and performance
• Contributed to full-stack development using React and Java

EDUCATION

PG Diploma in Artificial Intelligence (PG-DAI) Aug 2025 – CDAC, Noida

Bachelor of Engineering (B.E.) in Computer Science
S.K.N. Sinhgad Institute of Technology and Science, Lonavala
Affiliated with Savitribai Phule Pune University

CERTIFICATIONS

- **Applied Diploma in Full Stack Web Development with Java**| Teknowell EduTech (Pune).
- **AWS Certified Developer - Associate (In Progress)**
